Summary

Web Developer with 3+ years of experience in Laravel, PHP, and JavaScript. Builds responsive, scalable, and performance-focused web applications with clean and maintainable code.

Professional Experience

Full Stack Web Developer, Newline Empire

05/2023 – 08/2023 | Islamabad

Newline Empire is an IT startup focused on web development, software solutions, and modern technology. I contributed to building a Device Specs blog and developed their official website.

Full Stack Web Developer, Aqua Globe

10/2023 – 08/2024 | Rahim Yaar Khan

Aqua Globe is a tech blog offering reviews and news on gadgets and smart devices. I migrated it from PHP 7.1 to 8.2, redesigned it, and successfully monetized it.

Full Stack Web Developer, Self-Employed

03/2023 – Present

Worked with global clients on PHP and Laravel projects, building custom features, fixing issues, improving performance, and delivering successful solutions with positive feedback.

Education

Intermediate in Computer Science (ICS),

Allama Iqbal Open University

09/2023 – 04/2025

Completed ICS with a focus on computer science, gaining foundational knowledge in programming, mathematics, and problem-solving skills.

Skills

Frontend:

HTML, CSS, JavaScript, Tailwind, Bootstrap, GSAP, ReactJS, NextJS

Backend:

Laravel, PHP

Database:

MySQL, SQLite

Tools:

Github, Antigravity, Lovable, WordPress, Claude, VS Code
